AMS is now offering Photocatalytic Oxidation (PCO) units that are placed in your homes HVAC system to protect your entire family. Photocatalytic Oxidation (PCO) is a very powerful air purification technology and has the ability to destroy particles as small as 0.001 microns (Covid .05-0.2) whereas HEPA filters can only filter particles as small as 0.3 microns. Photocatalytic oxidation destroys microbes, viruses, bacteria, volatile organic compounds (VOCs), and other chemically active compounds (CACs).

TRIO-1000 PCO Portable Air Cleaners are also in Stock
