New mid-plate tanks have arrived! AMS has 13"x 54" Almond, Dual-Media softener tanks that separates resin on the bottom from carbon on top. These tanks can accept 1cf up to 1.5cf of resin.

- Single tank system accepts Fleck or Clack digital and mechanical valves.
- Systems can accommodate 32,000 or 48,000 grains of hard water capacity.
- Activated Carbon designed to reduce, chlorine, chloramines, improve taste, eliminate odors and extend resin life.
- Specially encapsulated distributor plates are manufactured from glass reinforced polypropylene plastic.
- Plates are laser welded and the same size as tank maximizing distribution through the entire media bed
- Uniformity of .010 - .013 plate slot size for reduced pressure drop.

We also have 10"x 54" mid-plate tanks. Good for 3/4 cu. ft. softener/carbon units.

Fresh Inventory of Calcite/Flo-Mag MIX Buckets

High quality Georgia Marble Calcite/Mag-Oxide Mix

Thomasville Fine Calcite/Mag-Oxide Mix

5 to 1 mixture of Calcite and Magnesium Oxide in your acid neutralizer to correct a low pH imbalance of your water.
